## **DETAILED ACTION**

Receipt is acknowledged of applicant's remarks and RCE, which were filed on 25
 February 2010.

• Applicant's remarks regarding the 35 USC 103 rejection over Policappelli in view of Lowenstein are persuasive; as such, said rejection is hereby withdrawn. As indicated in the remarks, the prior art teaches single salts of HCA; i.e. either calcium HCA salts, or potassium HCA salts, or sodium HCA salts. The instant claims are distinguished from the prior art in that they recite mixed salts of HCA; i.e. calcium and potassium or sodium HCA salts. Further, applicants have shown unexpected results using the claimed salts; i.e. increased solubility, decreased hygroscopicity, and negligible odor, taste, and color.

## **Double Patenting**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 25-27, 29, and 31-41 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 3, 4, 6-11, 13, 15, 18-20, 22-26, and 28-30 of copending Application No. 11/209429 ('429). Although the conflicting claims are not identical, they are not patentably distinct from each other because '429 a dietary supplement composition for reducing body weight comprising a double or triple salt of hydroxycitric acid wherein two or more cations are selected from the group consisting of calcium, potassium, and sodium or a mixture thereof (see claim 1). A claimed concentration range of calcium is 14 to 26% and a claimed concentration range of potassium is 24 to 40% (see claim 3). As such, a person of ordinary skill in the art at the time the instant application was filed would have found claims 25-27, 29, and 31-41 of the instant application *prima facie* obvious over claims 1, 3, 4, 6-11, 13, 15, 18-20, 22-26, and 28-30 of copending Application No. 11/209429 ('429).

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
